**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Aono et al (JP 2001-234798).

Aono et al teach an air flow rate sensor which is positioned downstream from a throttle valve located in an air intake passage of the internal combustion engine and which measures a quantity of air suctioned into the internal combustion engine; and a control section which calculates a fuel injecting quantity in accordance with measurement information outputted from the air flow rate sensor and which outputs a signal to a fuel injecting device of the internal combustion engine.
